

LES GLOBES DE CRISTAL

Art & Culture

Press Release

December, 8 2016

On Monday, January 30th, 2017, talented artists from the world of arts and culture, well-known figures, partners will get together at the legendary Le Lido in Paris to show their support for this ceremony.

The Honorary President Olivier Dassault, passionate entrepreneur

That France offers another way of experiencing culture in the world is your doing, dear artists. May you be honoured for it!

“I used to make short films before photography swept me away. As a musician and film producer, I have only the highest esteem for each artistic universe. Creativity, boldness and excellence are the fruits which our Nation lovingly grows, hearkening back to Voltaire and establishing itself as the nation of freedom and expression of the arts. What a delight it is to revel in passions brought alive - may originality keep indifference forever at bay

Celebrating such disciplines as literature, theatre, cinema and fashion, is also a way of acknowledging the power of attraction which France, the Nation of Lights, continues to enjoy. Actors, authors, directors, and many other unofficial ambassadors of all things "made in France", will take to the glittering legendary stage of the Lido, for a single evening dedicated to today's most promising talents and those who have earned the public's regard. Over the years, The Globes du Cristal have become an institution. With its judging panel of sharp, eloquent minds on the fore of the cultural scene, chaired this year by iconic French figure Ms Catherine Deneuve...

The stage is set for the 11th Awards Ceremony to meet with all the success it deserves.”
